

## Important advice and instruction for safe use of webbing slings

1. Before use, select the correct flat webbing or round sling with regard to its application, capacity and the surface conditions of the load.
2. The permissible capacity of the slings must not be exceeded.
3. Do not use webbing sling if tag is removed.
4. Inspect sling for damage before each use.
5. Do not use sling if there is any sign of a cut cover, snagging, heat or chemical damage, excessive wear, damaged seams, any other defects or presence of grit, abrasive materials or other deleterious material.
6. Do not tie knots in sling.
7. Protect sling from sharp edges and rough surfaces.
8. Position slings in such a way, that they hold the load securely.
9. Do not expose sling to temperatures above 90°C.
10. Do not allow abrasive or other damaging grit to penetrate the fibers.
11. Consult dhm before immersing a sling in a chemical solution.
12. Keep away from strong alkalis.
